

**West Susitna Access Road Project Environmental Phase Public Comment Period  
7/23/24 – 8/23/24**

The Alaska Department of Transportation & Public Facilities (DOT&PF) is hosting a public comment period from July 23rd through August 23rd, 2024, for the environmental phase West Susitna Access Road (WestSu Access) Project. This project proposes to construct an approximately 22-mile public road to open more than 6 million acres of land for recreation, tourism, and potential future development. This road is proposed to extend from the existing roadway system in the Matanuska-Susitna Borough to State lands planned for settlement, public recreation, and resource development.

The WestSu Access project team is launching a National Environmental Policy Act (NEPA) process. Your input during the formal scoping process will help us identify potential environmental, social, cultural/historic, and economic effects and potential mitigations for this project as well as identify and refine the alignment for the road.
